

Performance Testing

Date: 03 July 2026

Team ID:

Project Name: Credit Card Approval Prediction

Step 1: Testing Overview

Field	Details
Testing Tool Used	Postman
Type of Testing	Load Testing
Target Module / API	Credit card Approval API
Test Environment	Local Environment
Test Date	4th july 2026

Step 2: Test Scenarios

S. N O	Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Submit applicant details for approval prediction	10	60	Prediction generated successfully
2	Multiple users request predictions simultaneously	25	120	System handles concurrent requests without failure
3	Large volume of prediction requests	50	180	Response time remains within acceptable limits
4	Continuous prediction requests under load	75	300	

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status	Remarks
1	Average Response Time	< 2 sec	1.5sec	Pass	Meets target
2	Maximum Response Time	< 5 sec	3.2sec	Pass	Within limit
3	CPU Utilization	< 80%	65%	pass	Stable performance

Step 4: Observations & Analysis

- The system processed prediction requests successfully.
- Response times remained within the target range.
- No major errors were observed during testing.
- Overall performance was satisfactory.

Step 5: Screenshots / Evidence

Attach screenshots of:

1. Postman test results.
2. Credit card approval prediction output.
