

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	28 Juiy 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Data Preprocessing	Handle Missing Values, Encode Categorical Data, Feature Scaling
FR-4	Credit Card Approval Prediction	Train ML Model, Predict Approval Status (Approved/Rejected), Display Prediction Result
FR-5	Result Visualization	Show Prediction Output, Display Accuracy and Performance Metrics
FR-6	Report Generation	Generate Prediction Report, Download Result

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should provide a simple, user-friendly interface for easy data upload and prediction.
NFR-2	Security	The system should provide a simple, user-friendly interface for easy data upload and prediction.
NFR-3	Reliability	The system should produce accurate and consistent prediction results with minimum errors.
NFR-4	Performance	The system should process input data and generate credit card approval predictions quickly.
NFR-5	Availability	The system should be available whenever users need to access it with minimal downtime.
NFR-6	Scalability	The system should support larger datasets and increasing numbers of users without affecting performance.
