

Project Design Phase
Problem – Solution Fit Template

Date	28 july 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Define CS & Validate CC	1. CUSTOMER SEGMENT(S) CS - New credit card applicants - Existing customers requesting additional credit cards - Young professionals & salaried individuals - Self-employed & business owners - High-value customers	6. CUSTOMER CONSTRAINTS CC - Longer approval turnaround time - Complex documentation requirements - High rejection rate due to risk - Lack of transparency in approval criteria - Security & fraud concerns	5. AVAILABLE SOLUTIONS AS - Machine learning model for prediction - Automated document verification (OCR) - Credit bureau data integration - Real-time fraud detection - Explainable AI for decision transparency	Explore AS, Differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P - Reduce manual effort in evaluation - Accurately assess applicant creditworthiness - Minimize default risk - Provide fast approval/decision - Improve customer experience	9. PROBLEM ROOT CAUSE RC - Inconsistent manual evaluation - Incomplete or inaccurate applicant data - Lack of unified data sources - Traditional rules are not adaptive - High dependency on human judgment	7. BEHAVIOUR BE - Applicants submit incomplete information - Customers abandon due to long process - Branch staff rely on manual checks - Risk teams spend time on low-risk cases - Customers seek cards from competitors	
Address TR, EM and Define CL	3. TRIGGERS TR - Applicant applies for a credit card - Promotional offers / marketing campaigns - Pre-approved offers from bank - Need for higher credit limit	10. YOUR SOLUTION SL - Build ML model to predict credit card approval (Approved / Rejected) - Use applicant data: demographic, financial, employment, credit history, etc. - Feature engineering & data preprocessing - Train & evaluate model (Logistic Regression / XGBoost / LightGBM) - Integrate with bank system for real-time prediction - Provide explainable reasons for decision - Continuously monitor & improve model	8. CHANNELS OF BEHAVIOUR CH - Bank website / mobile app - Branch offices - Customer service - Email / SMS notifications - Partner channels	Explain Channels & Differentiate CL
	4. EMOTIONS: BEFORE / AFTER EM Before After - Anxious about approval - Uncertain about eligibility - Worried about rejection - Frustrated with paperwork - Confident & satisfied - Feels valued - Happy with quick approval - Trust in the bank increases		11. UNIQUE VALUE CL - Higher approval accuracy - Faster decision (real-time) - Reduced default risk - Better customer experience - Data-driven & fair lending - Scalable & cost-effective solution
