

Scalability & Future Plan

Date: 03 July 2026

Team ID: ____

Project Name: Credit Card Approval Prediction

Maximum Marks: 1 Mark

Scalability & Future Plan

This document outlines how the Credit Card Approval Prediction System can be scaled to handle larger user bases, increased data volumes, and additional functionalities in the future. It also presents a roadmap for future enhancements.

Current System Limitations

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset size	May affect prediction accuracy	High
2	Local deployment only	Restricted user accessibility	Medium
3	Basic security features	Limited protection for sensitive applicant data	High

Scalability Plan

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited concurrent users	Deploy on cloud infrastructure to support larger user traffic
2	Data Storage	Uses local dataset files	Integrate cloud databases for scalable storage
3	Performance	Single-machine processing	Optimize model and use distributed computing resources
4	Security	Basic input validation	Implement authentication, encryption, and secure APIs

Future Roadmap

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Improve machine learning model accuracy using larger datasets	3 Months	Better prediction reliability
Phase 2	Cloud deployment and online accessibility	6 Months	Increased availability and scalability
Phase 3	Integration with banking and credit bureau systems	9 Months	Real-time applicant verification
Phase 4	AI-powered risk analysis and recommendation system	12 Months	Enhanced decision-making and user experience
